

2011 - a new year

new services

Pyrosequencing DNA-Methylation, Allele Frequency, Genotyping, ...

EXPERT Service

- Assay Design by customer
- Sequencing primer: shipped by customer
- Sequence-to-analyze and Dispensation Order: given by customer
- PCR/Amplicons: done by customer
- 1 Run/Sample/Sequencing rxn., standard procedures (wo. rerun in failed cases or nonsense signals)
- Data support as analyzed by factory settings
- Data served by email
- Price/Run: EUR 9-14* (depending on volume, min. 8 samples per order)

PREMIUM Service done by varionostic professionals

- Assay Design incl. establishing/optimization by varionostic professionals
- Sequencing primer: designed and synthesized by varionostic
- Sequence-to-analyze and Dispensation Order: included by Assay Design
- PCR/Amplicons: by varionostic
- 1 Run/Sequencing rxn., standard procedures (incl. 2 reruns in failed cases or nonsense signals)
- Controls (pos./neg.) included
- Editing of runs
- Optional: calibration experiments (7 controls 0%-100%, Methylation experiments only): EUR 260/calibration experiment
- Analyzing Report: complete details of all lab work, incl. primer sequences, PCR protocols, ... > 'ready-to-publish' quality
- Consulting service on technology and results
- Data support as analyzed by optimized settings
- Data served by email
- Price/Assay Design and experim. optimization: EUR 1.149*
- Price/Bisulfite Conversion: EUR 15-18* (depending on volume)
- Price/Run: EUR 14-18* (depending on volume)

Capillary sequencing short/long reads, microsatellites, LOH, ...

- Standard primer available (e.g. M13, T7)
- Data support by email (normally within 1 to 2 business days after sample receipt)
- Important sample details to bear in mind: shipping, amounts of DNA, etc. > please discuss with us!
- Editing of data on request
- Prices: on request

- * all prices plus VAT
- * prepaid packages: please send request to sequencing@varionostic.de
